

Medical Management of Caries & Silver Diamine Fluoride / Silver Modified Atraumatic Restorative Therapy

Friday, October 27, 8:30 am-3:30 pm
North End Studio A – 294 N. Winooski Avenue
Burlington, VT

Each year Vermont spends about \$2 million treating early childhood caries (dental decay in children under age six) in hospital settings under general anesthesia.

For:
Physicians, Physician Assistants,
Nurse Practitioners, Nurses,
Dentists & Dental Hygienists,
Public Health Professionals
and Policy makers

Program is free
Lunch on your own!

Silver diamine fluoride (SDF) is a new, FDA approved evidence-based treatment ideal for treating caries in people who are unable to access dental treatment or tolerate conventional dental care, including very young less cooperative children, persons with intellectual, developmental disabilities, patients with xerostomia, or older adults. It is a simple procedure not requiring specialized equipment that can be provided in medical practices, WIC clinics or other public health settings.

Presented by:

John Frachella, DDS, DMD

Dr. Frachella is a pediatric dentist and a national leader in the use of SDF (silver diamine fluoride). Over the past decade, Dr. Frachella has been using silver solutions in combination with glass ionomer technology to arrest caries while simultaneously addressing destructive dental cavitation. He sees the minimally invasive medical management of caries as a new, historically proven, and highly preventive standard.

CME & Nursing Contact Hours:

The Northern Vermont AHEC designates this live activity for a maximum of 6.0 *Category 1 Credits™* towards the AMA Physicians Recognition Award. Northern Vermont AHEC is approved as a provider of Continuing Medical Education (CME) by the New Hampshire Medical Society,

Northern Vermont Area Health Education Center is an approved provider of continuing nursing education by the Northeast Multi-State Division of the American Nurses Credentialing Center's Commission on Accreditation. This educational event supports up to 6.0 Contact Hours.

"I'm going to try to attend this and will tell my colleagues within NCHC about it; it sounds potentially revolutionary and very helpful for our patient population!" ♦ Sarah Morgan, MD
